

ACCESS ALL YOUR DATA ANYTIME, ANYWHERE FROM ANY DEVICE

SugarSync is a leading provider of Personal Cloud services. With SugarSync, you can backup, sync, access and share all your files on-the-go, instantly and securely from any device including PC, Mac, iPhone, iPad, Android, BlackBerry, and more. SugarSync matches the way you organize your files and folders. You can sync any file or folder from any of your computers and access those files and folders via your Personal Cloud.

ANYTIME, ANYWHERE ACCESS

Remote access to all of your data, right from your smartphone, tablet, or any browser.

SYNC MULTIPLE DEVICES

Sync files and folders across multiple computers and devices. Works on Mac, Windows, and mobile devices including iPhone, iPad, Android, BlackBerry, Symbian and Windows Mobile.

SECURE ONLINE BACKUP

Continuous online backup of your files to your secure, Personal Cloud. Data is encrypted on transfer using SSL and stored securely using 128-bit AES.

SIMPLE FOLDER & FILE SHARING

Share files with friends and collaborate with colleagues, instantly.

“ SugarSync is so good, it gets a rating of 5 out of 5! ”

Mark Gibbs, Network World

“ One of my favorites in this category is SugarSync. ”

Walt Mossberg, Wall Street Journal

RELAX WITH CONFIDENCE KNOWING THAT YOUR IMPORTANT FILES, PHOTOS, VIDEOS AND MUSIC COLLECTION ARE SECURELY BACKED UP

ONLINE BACKUP

- **Secure, continuous, and automatic file backup.** With SugarSync, all of your documents, photos, videos, and music from all your computers are continuously backed up online to your secure Personal Cloud.
- **No manual uploads or scheduling required.** SugarSync immediately backs up changes that you make to your files, working quietly in the background without interfering with your productivity.
- **View and restore previous versions of your files.** The previous five versions of each file are stored in case you need to reference or recover them in the future. At any point in time, and from any of your computers, you can easily view these versioned files, restore them, or save them as a separate file.

NEVER BE WITHOUT YOUR FILES, PHOTOS, VIDEOS, AND MUSIC

REMOTE ACCESS

- **Get remote access to all your files and folders from any browser.** SugarSync provides remote access to all your files, folders, photos, and media from any of your computers directly from your secure personal SugarSync website.
- **Access files and folders on-the-go right from your smartphone or tablet.** With the SugarSync app installed on your mobile device, you can access files from any of your computers, share photos with friends and family, and upload files and photos from your mobile device to your computer (without wires!) SugarSync has mobile apps for iPad, iPhone, iPod Touch, Android, BlackBerry, Windows Mobile, and Symbian devices.
- **Edit files remotely and your changes sync to your computers and devices.** Since you have access to your files via your personal SugarSync website and the SugarSync mobile app, you can edit files from anywhere. All changes that you make sync back to the cloud and to your other computers and devices automatically.
- **Enjoy your complete music and photo collections.** Stream your entire music collection and show photos from any of your computers directly from the SugarSync website or on your mobile device with the SugarSync app.

KEEP YOUR IMPORTANT FILES AND FOLDERS UP-TO-DATE ACROSS MULTIPLE COMPUTERS AND DEVICES.

SYNC MULTIPLE DEVICES

- **Automatically sync files across computers.** Sync files and folders across multiple computers and devices. You'll always have the most current version of a file. For example, you can start editing a file on your office PC and finish it on your Mac at home.
- **Select only the folders and files you need.** With SugarSync, you decide which folders you want to sync and where you want to sync them.
- **Stay in sync even when you work offline.** Changes that you make to files locally on your computer when you are offline are automatically synced the next time you are online. For example, if you are travelling with a laptop and make changes while on an airplane, the files you changed are automatically synced to the cloud and to your other computers the next time your laptop connects to the Internet.

SHARE FILES, FOLDERS, PHOTOS, AND VIDEOS WITH FRIENDS, FAMILY AND CO-WORKERS

FOLDER & FILE SHARING

“ I use SugarSync to automatically back up certain folders on my computers to the internet and to sync the same folders among every computer I run SugarSync on. ”

Harry McCracken, Time

- **Share files the way you want.** Send any file, of any file size, to anyone. With SugarSync, you can generate a public link for any file that can be shared directly on Facebook and Twitter, or through email, IM, or your blog. Recipients can directly download the most recent version of the file by simply clicking the link—no registration is required!
- **Share folders to easily sync information across teams.** Give a person, or a group of people, access to a shared folder on your computer. Folder members can sync folders directly to their own computers and edit the content locally. Edits are synced to all folder members as soon as the file is saved.
- **Share photo albums.** Because SugarSync automatically organizes your photos into albums, sharing photos is easy. Your friends and family get instant access to slideshows, and high-resolution photos, no sign-up required.

REST ASSURED THAT YOUR DATA IS ALWAYS SECURE AND SAFE

DATA SECURITY & PROTECTION

- **All data transfers are encrypted.** For maximum security, your files are transferred over the Internet using TLS (SSL 3.3) encryption, the industry standard for secure web communications.
- **Data storage is secure and redundant.** Your data is stored redundantly in carrier-grade data centers and is encrypted using 128-bit AES – the same level of protection used for online financial transactions.
- **Safely share files with others.** SugarSync provides several options when sharing folders including the ability to set permissions whether folder members can make changes or add files.

USE SUGARSYNC ON A BROAD SET OF COMPUTING AND MOBILE PLATFORMS

CROSS-PLATFORM SUPPORT

- **Desktop:** SugarSync works on Mac and Windows computers and supports syncing between any combination of these operating systems.
- **Web:** Your personal SugarSync website is available from all common browsers.
- **Mobile:** The SugarSync mobile app is available on the most popular mobile devices.
